## Large Senior Electric Group Attend District Convention Of The A.I.E.E. at Buffalo

### For Second Consecutive Year Tech Student Wins First Prize at Convention

#### KORMAN WINS FIRST

### Abner Crumb's Paper on Power Circuit Filters Gets Honorable Mention

For the second consecutive year a Worcester Tech student has been awarded first prize for the best presentation of a technical paper at The Annual District Convention of the American Institution of Electrical Engineers. Nathaniel I. Korman won this honor at the recent meeting at Buffalo, N. Y., where he presented a paper at the student technical session of the convention on May 7th. All the colleges in the A. I. E. E. in the Northeastern District which includes New York state are requested to present papers at this convention and Mr. Korman was in direct competition with papers from M. I. T., Yale University, Cornell University, and Rensselaer Polytechnic Institute. At a similar convention last year Mr. Lester Libby, a graduate student in the electrical engineering department at that time, was awarded first place for his paper—"The Cathode Ray Tube As A Voltmeter At Ultra-High Radio Frequencies."

Mr. Korman's paper described his work at Tech during the past year in the adaptation of a small cathode-ray tube for oscillographic purposes through the construction of suitable control circuits. The title of the paper was—"Design, Construction, and Testing of a Small Cathode-Ray Oscillograph."

A second paper was presented by Abner Crumb of Norwich, Conn., who is now a graduate student in the electrical engineering department. It was a singular honor that this paper received honorable mention. Mr. Crumb's paper described his work in building a power filter circuit for a large A-C generator. He has been undertaking this research in connection with his advanced course in electrical engineering. His paper was entitled—"Power Circuit Filters For A-C Generators." Mr. Crumb was not eligible for a prize award being a graduate student.

There was a large group of students from colleges throughout the district in attendance at the Buffalo convention and seventeen students attended from Worcester Tech. These were: Abner Crumb, a graduate, Seniors: W. B. Bauer, Jr., C. C. Cutler, G. G. Erikson, S. L. Hyman, N. I. Korman, R. J. Lyman, J. E. Poeton, Wm. Price, A. J. Schumer, P. J. Stone, H. R. Townsley, H. T. Wrobel. Juniors: R. P. Day, R. I. Gray, R. K. Houston, S. S. Howes, B. R. Lovelace.

This is the second high honor which Mr. Korman has recently received as only three weeks ago he was awarded the Charles A. Coffin Fellowship for the coming year. This award will permit him to continue his studies as a graduate student next year.

Professor Theodore H. Morgan and

## Masque Asks For Student-Written Production

### Student Author Would Receive Royalty Now Paid Stock Companies

Since nineteen eighteen the Masque Association has not presented a play written by a student, or students, of Worcester Tech. For the past twenty years the association has been forced to present stock plays with results, sometimes good, sometimes indifferent.

The dramatic clubs of almost every other college in the country, technical schools included, have at their disposal plays written by students. Why is there such an apparent dearth of talent at Worcester? There is a splendid opportunity for some student with talents along this line to get a play presented. The Masque wants such a play. They will pay the student-author the royalty that they are now paying for stock productions. This amounts, in most cases, to a sum of about fifty dollars. This is not a sum to be taken lightly.

Of course, there is a lot of work entailed in such a matter. Still, students who have athletic ability are putting in a great deal of their time in practice sessions for the various sports in which they participate. If a student should put in an amount of time comparable with that spent by other students in practice for athletics—about two hours a day for a period of two or three months—he should be able, if he has talent, to work up a presentable show.

The cry is that there are no students in the school with such talent; that this is a technical school and anyone with inclinations along this line would choose a liberal arts college. Perhaps this is so; perhaps not. It seems reasonable to assume that if other technical schools can produce student-written plays, that Worcester Tech also can. Since plays of this type were presented here in the past, why can't they be presented in the future?

The coming summer vacation is an ideal time to get started on such a venture. How about it you potential playwrights?

Mr. Victor Siegfried of the Department of Electrical Engineering also attended the Buffalo convention.

## Tech Glee Club To Broadcast

### To Present Concert Friday Evening, May 21

On Friday evening, May 21st, and again on Sunday afternoon, May 23rd, the Worcester Tech Glee Club will present a concert by radio. Last year the same idea was used, with very gratifying success, and it is at the invitation of the Boston station that the Friday concert will be held.

The first presentation will be from nine to nine-thirty in the evening. The club will travel to the Boston studios of WAAB. From there the program will be rebroadcast by the following stations throughout New England: WBRV, Waterbury, Conn., WNBH, New Bedford, Mass., WLLH, Lowell, Mass., WLNA, Laconia, N. H., WRDO, Augusta, Maine, WNBX, Springfield, Vt., and WFEA, Manchester, N. H.

As none of these stations will be easily received in Worcester, arrangements are being made to present the organization from station WTAG in Worcester on Sunday afternoon. The time for this program has not been definitely announced as yet, but the exact hour will be printed in the local papers.

The program will consist of several selections by the entire club, including some songs prepared especially for the broadcast, and there will also be offerings by the W. P. I. quartet, made up of William Worthley, Roger Iffland, Merrill Skeist and George McKenna.

## Music by Popular Ken Reeves And Smart Country Club to Make Soph Hop Big Affair

### Karl W. Scholz To Lecture at Next Assembly

### Prof. to Treat Communism And Fascism in Theory And Practice

Prof. Karl W. H. Scholz, author, lecturer and Professor of economics at the University of Pennsylvania will be the next and last speaker at the final assembly in the present series of Fuller programs, tomorrow at 11:00 in the gym with the subject "Communism and Fascism in Theory and Practice." Prof. Scholz will treat especially Soviet Russia and Nazi Germany.

Prof. Scholz was born and brought up in Germany but came to the States to do college graduate work at the University of Pennsylvania, where he is now Professor of Economics at the Wharton School of Finance and Commerce.

He is the co-author of the successful book, "Economic Problems of Modern Life." He has written himself numerous other books on this subject and various others.

Prof. Scholz first visited the Soviet Union in 1927 and since then, in less than nine years, has made four other visits. While making his visits to Russia, Prof. Scholz revisited his original country to study the development of their economic and political systems. Nazi Germany and Soviet Russia are the two most outstanding countries of the world today who have radically changed their political systems and economic base with such rapidity in the world of time that they offer the most exceptional study of anywhere in the world. It is with a distinct advantage of Prof. Scholz's ability to speak German as a native and his former contacts that he was able to contact high government officials in both countries and thus can give first hand actual experiences and facts undiluted by a Hitler suppressed and censored press.

During his visit to Russia in 1935, Prof. Scholz was able to travel 3500 miles from Leningrad in the North to Tiflis and Batum in the South. Prof. Scholz has given similar lectures in the past to groups all over the United States and W. P. I. is being given a distinct privilege to hear one of his lectures.

### Committee Working Hard on Completion of Plans to Present Unique Dance

#### TICKETS LIMITED

### Students at Katherine Gibbs Protest School's Omission Regarding Ken Reeves

Only eleven more days before the final social event of the season at Tech. What more could you desire—the smart, beautifully landscaped Worcester Country Club bathed in the silvery rays of a full moon.

Why is this one of New England's most popular college bands? What other college band has played at 20 out of 22 fraternity dances, and repeatedly held sway at numerous gala functions, such as the Military Ball of the Scabard and Blade at M. I. T.? What other college band has played two consecutive engagements at the Dartmouth Winter Carnival, at Mt. Holyoke proms and rendered its rousing rhythm at such glamorous spots as Wellesley, Vassar and Radcliffe? None—therefore one is forced to conclude that this is one of New England's foremost college bands.

We cannot hope to convey to you the way which Ken Reeves is received at his numerous engagements. However, this letter written by indignant representatives of Katherine Gibbs school shows the esteem in which these colleges hold their relation with Ken Reeves.

Editor-in-chief  
Tech News.

Dear Sir:

As representative of an exclusive school in Back Bay, Boston, we resent deeply the omission made by one member of your worthy staff.

In regard to the article printed in your paper of Tuesday, May 11, 1937. We would like to know why we were overlooked in the list of prominent colleges mentioned in the aforesaid article.

On the evening of December 15th 1936 at 8:30 o'clock in the Hotel Vendome, Commonwealth Avenue, Boston, Ken Reeves appeared with his smooth orchestra.

We as representatives of the Katherine Gibbs School demand that we be given recognition in your so-called newspaper.

(Signed) V. L., R. N.

Ed. note: Please accept our humble apology for the aforementioned omission but at the same time realize that it is impossible in a single article to mention every prominent place at which this excellent orchestra has played.

From all of this you undoubtedly have gathered that you will be doing yourself an injustice by not attending this fine affair which incidentally provides an opportunity for a final fling before exams. Therefore, step right up and get one of those valuable tickets—don't forget the supply is limited—from one of the following:

Bob Lloyd, Brad Waterman, Jack Lancaster, Tom Bourne, Bob O'Malley, Ed Kien, Al Raslavsky, Paul Johnson and Sam Kaplan.

## JUNIORS

### Skull Tapping Tuesday, May 18, 1937, 11 A. M. At Student Assembly

#### All Juniors Be Sure To Attend

## civilizer

Engineers are often referred to as bookworms, uncivilized, unsociable and unable to meet people of the cosmopolitan world on an equal basis. This is perhaps true to some extent and we should try to do all we can to remedy the condition. A good deal has been said to the seniors who are looking for jobs about the correct method of meeting men of the business world; we herein publish a group of rules written by Dr. Vincent W. Lanfear, University of Pittsburgh, supposedly to help ALL students:

1. No man should keep a pipe, cigar or cigarette in his mouth when he lifts his hat to a woman.

2. When you enter an office, place your hat in an inconspicuous place and remember where.

3. Do not tell colleagues in the office where you are employed, "whom you met last night, what a fine time you had, or how late you got home."

4. While it is customary in Europe for a woman to sit at a man's right in a taxicab, it is perfectly proper for a woman to sit on a man's left in the United States.

5. A man meeting a woman acquaintance on a train does not offer to pay for her ticket, nor her meal in the diner, nor the magazine she buys. Nor does he offer to pay the porter who carries her bags.

6. When making introductions, don't command—don't say, "Mr. Wood, meet Mr. Sells."

7. Always "remember" meeting people who remember meeting you, even if you can't recall.

8. It is more embarrassing to find yourself in dinner coat and black tie when your host is wearing informal clothes than to wear informal clothes when your host is dressed formally.

9. The ideal bridge player never notices his partner's mistakes. But he always gives credit for a good play.

Undoubtedly a little study of such things as the above would greatly aid us as engineers to become a little more "civilized" and to be on a par with those of the business world when we go out to meet them.

There are those of course who believe the engineer need not worry about his social life, but these few people are in

## Departmental Notes

## Chemistry Department

On Friday, May 14, the Skeptical Chymists made their annual trip to Boston in conjunction with the senior class. The Revere Sugar Refinery was visited in the afternoon while the meeting of the Northeastern Section of the American Chemical Society was attended in the evening. At the meeting Dr. Wilder D. Bancroft, past president, addressed the section on "The Energy Hump in Chemistry."

An additional number of seniors have made plans for the fall: Richard P. Harvey has accepted a position with the Simonds Saw Company of Fitchburg, Mass.; Lawrence K. Barber, with the Lawrence Leather Company of Peabody, Mass.; Edward H. Hanson, with the National Aniline Company of Buffalo, N. Y.; and Leonard A. Young, with the American Steel and Wire Company. Henry S. Fuller will continue his studies at the Harvard Medical School. William F. Hall will remain at the Institute as a graduate assistant in Chemistry. Samuel S. Naistat is to become a graduate student, assisting in Physics.

## Electrical Department

The Worcester Section A. I. E. E. is to meet at Sanford Riley Hall on Tuesday, May 18. Mr. Karl B. McEachron, research engineer from the High Voltage Laboratory of the General Electric Company at Pittsfield, Mass., will talk on "Lightning," and will show moving pictures and slides. Students are particularly invited to attend this lecture at 7:45 P. M.

Preceding the meeting of the A. I. E. E. Prof. F. J. Adams will address the Seminar with the same subject "Lightning," giving particular emphasis to recent investigations.

Dr. R. A. Beth will talk at the Physics Colloquium, Tuesday, May 18, on "Beams of Atoms and Ions, a Review of Experimental Methods." In the past few years the subject of Isotopes has been of increasing importance. In order to study Isotopes one must have available atomic or ionic beams. Hence a discussion of the experimental methods of producing them is of timely interest.

a minority, and so to the majority of students at TECH we recommend the above list and any similar that are available.

Scholarships  
Announced For  
Class of 1941Twenty-seven Entering Men  
To Receive Financial  
Assistance

Announcement was made last Monday by the Scholarship committee and Pres. Earle of the Worcester Polytechnic Institute of the 27 men who would receive the matriculation scholarships for the incoming Fall Freshman Class. Usually only 25 scholarships are given but this year two three hundred dollar scholarships were divided in order to benefit two other boys.

152 applications were turned in to the Scholarship committee by boys who need some financial help during their first year here. Decisions on the awards were made on the basis of scholastic standing, the finances of the applicant and his prospects, his district, and also on the outside activities in which the applicant had taken part during his stay in a preparatory school.

Five of the scholarships have a value of \$450 for the first year and a condition of maintaining high scholastic standing in order to receive an additional \$300 for the following years. The other awards have a value of \$300 which is to be for one year only.

Applications were received from all New England States and New York, New Jersey, Maryland, Ohio, and the District of Columbia. All of the recipients were in the upper third of their class.

The awards were made to the following applicants: Frank A. Andrews, Jr., of Newport, R. I.; Albert Bellos of 113 Perry Avenue; Melvin Boright of Richford, Vt.; Albert H. Bowker of Washington, D. C.; Warren B. Brightly of Turners Falls; Lincoln J. Burns of Lynbrook, N. Y.

Sidney W. Clark of Washington, D. C.; Donald S. Denio of Henniker, N. H.; Gordon T. Gurney of Acushnet Station, New Bedford; Charles L. Hoebel of Waterbury, Conn.; Albert B. Hooke of Rome, N. Y.; Stephen Hopkins of Peekskill, N. Y.; George E. Jodaitis of Gardner.

John P. Karpoe of 628 Cambridge Street; Harry D. Kingsley of Springfield; R. Keith McIntyre of Washington, D. C.; Robert A. Muir of Niagara Falls, N. Y.; Edward W. Pacek of 1 Pitt Street; Russell W. Parks of Cincinnati, O.; William F. Paulsen of Springfield.

Donald E. Smith of Delmar, N. Y.; Richard P. Sprague of Bridgewater; Robert J. Sullivan of West Roxbury; Arnold H. Swanson of Dorchester; Victor H. Thulin of 24 Grammot Road; John G. Tryon of Washington, D. C., and William Ziegler of Lynbrook, N. Y.

Albert Bellos attends Classical High School where he has won athletic letters in football, basketball and cross country. John P. Karpoe, a South High senior, holds a letter in baseball and also plays basketball. Victor Thulin and Edward Pacek, the other city students on the list, also attend South High.

Harry D. Kingsley of Springfield who attended Classical High School in that city and is now at Phillips Exeter Academy is captain of the baseball team there and also holds letters in football and basketball. He has been president of his class for the past two years.

Also prominent students in the list include Frank A. Andrews, Jr., of Newport, R. I., a senior at Rogers High who holds a letter in football and who also plays basketball, baseball, and swims; Melvin Boright of Richford, Vt., who plays baseball, football, basketball and tennis, and Russell W. Parks of Cincinnati, Ohio, a letterman for two years in basketball, track and who is on the honor roll.

## Campus Chatter

Again we attempt to present the Walter Winchell of W. P. I. who sees all and tells all and then hides for three weeks at a time.

First item in the news of the day which is REAL NEWS is slightly old but still so good that we deem it News and fit to print. It seems that one fellow who has an orchestra which is pretty smooth and swiny, one Hal Kemp, was out at The Deck a little over a week ago. One Maxine Gray a singer who can sing and has a little something on the ball besides was noticeably falling for one of our stellar stars of the football and basketball teams. The last part of the evening was passed in each others' company and rumor has it that Jack has received three letters from her in the interim.

Second item of the day concerns a bashful romeo of the Freshman class, a man without equal, a man of the highest integrity and man who really appreciates a good column of the TECH NEWS when it's printed, one, Robert "Bob" Swift. And the gossip: he has secretly been aiding and abetting an affair with a five and dime girl, Woolworth's. We haven't seen her yet but a stool pigeon has it that she works on the second floor and is a blond of the "knock out drop type."

Third item concerns another Frosh. Why, we don't know; perhaps it's because most of the upper classmen are too far gone as a result of exams coming up in three weeks to do anything that is news. Well to continue, Arthur Francis, known under aliases as the New Bedford Hot Shot, Red, and Red Hot Art, Dark Alley Art and similar names ad infinitum (ask Prof. Morley) once worked for a fellow stude at the Worcester Girls Club, and to make a long story longer, met the hat and coat check girl. Culmination came last night when the original worker brought the girl too close to the original hero and the two took her out. Both gentlemen were able to walk her home inside of two hours with six alleys avoided. The phone number (because she really is one very nice girl) will not be divulged, as it isn't known.

Fourth item, we're getting no place fast, concerns Chief Engineer Boynton of the famous snow fort fame. Boynton, a thoroughly capable engineer has failed. He being in sound mind and body and with no malice aforethought entered the room of Henry Paulsen and C. Goodchild and in an attempt to set the mouse trap which the boys keep to catch rats like him, slipped and the mouse trap got him. Poor Boynton, an engineer who can't even set a mouse trap. Well perhaps it's because he's going to be a Chemist and not a mechanic.

Famous comments by more famous Professors.

"On the whole a very good talk." "I'm sick and tired of feeding you boys out of a baby's bottle." "Now gentleman uhr-rr- can't be wasting class time uhr-rr-let's get along with the work of the course." And now not a Prof. of W. P. I. but one of the professional stage or at least a was been of the stage of New York. Boys read it and weep. "College men are nice except those at Yale. I was in New Haven on several occasions and they were perfectly horrid." Ann Corio, strip-teaser, bares her—mind to a Daily Pennsylvania reporter.

Two illustrious Juniors, rumor has it, have taken the long trail for Ina Ray Hutton and her all girl orchestra who were at the Coconut Grove Saturday night. Their plans include following the girls all over the country this summer.

Who is the most honest man in the Junior class?

Headline, Sophomore class has squab-

(Continued on Page 4, Col. 4)

Winchell Defends  
College Press

## Collegiate Press Review

Hollywood—Walter Winchell rose staunchly to the defense of collegiate press freedom last week, decried recent red-baiting of editors on certain major campi, and blasted away at various school officials, some of whom he's "pretty sure were put on the pay-roll to suppress student expression of thought."

"I don't believe in censorship of any kind as long as papers are kept clean and free of libel," vigorously declared the columnist-actor-radio commentator in an interview, following his Sunday broadcast.

"Student editors, as much as anyone else, have a right to present their views. When censorship steps in, it makes parrots out of us, just as it does under Mussolini, Hitler, or any of the other dictators."

Appraised of the action of school administrative authorities who last fall muzzled a student publication after it attacked one of the presidential candidates, Winchell snorted:

"Yes, of course. They would. Administrative control is one of the problems college editors have to face, and nothing can be done about it.

"We had the same thing back in New York." (A college editor there was suspended a few years ago, assertedly because he charged his school with subsidizing athletes.)

Commenting upon a recent incident, wherein a campus editor was labeled 'red' because of his alleged pro-labor and pro-New Deal views, Winchell declared it was "too bad."

A group of students had written a letter of protest to the college daily, saying in part:

"When we . . . get out of school we are confronted by employers who don't like us because we come 'from that red school.' This radicalism is not so funny if it keeps you from getting a job."

The letter also suggested that the editor "change the paper's print to crimson and rename it the Daily Hammer and Sickle."

"I know that college editors have been called 'reds,' and it's foolish," Winchell said. "Even administrative officers have sometimes encouraged such action. I'm pretty sure some of those fellows were put on the pay-roll to do just those things.

"But it would be pretty bad if everything people said about you were true. 'Walter Winchell said this' and 'Winchell said that,' is something I hear every once in awhile. Well, Winchell did NOT say it!"

"I sympathize with the college journalist," Winchell concluded, "and I want you to know I'm for you 100 per cent!"

# Tech Team Defeated by Powerful Rams

## Bigler's Crack Baseball Nine Tastes First Defeat Tuesday Dropping 5-1 Game to Rams

**Engineers Helpless Before Expert Pitching of Bill Fitch**  
**GAME AT KINGSTON**  
**Driscoll Allows Ten Hits in His First Appearance As Pitcher**

Tech's nine suffered its first defeat of the season when it traveled to Kingston last Tuesday to play Rhode Island State. The Engineers found themselves helpless before the pitching slants of Bill Fitch who limited them to four hits and one run. The final score was 5-1, the Rhode Islanders getting ten hits from Driscoll.

State started the scoring by tallying twice in the initial inning. These runs were accounted for by Don Graham's single to left, a stolen base, a double knocked out by Ed Fay, a passed ball by Lambert, and Rushton's error in fielding Entin's grounder.

The next four innings turned into a pitcher's battle with both twirlers pitching shutout ball and allowing only a few men to get on the base paths.

Tech rallied in the sixth and nearly tied the score. Driscoll opened the inning with his second hit of the game, a double to left center. He nearly died on base when Gutafson was retired by a fly to center field and Wingardner was thrown out on a grounder to second. However, Rushton came through with a long triple down the right field foul line scoring Driscoll. Rushton died on third when Forkey struck out.

Rhode Island increased their one run lead in this same frame by also tallying a run. Messina's single, a stolen base, a passed ball, and a wild pitch were responsible for this run. The ball game was sewed up in the following frame by Rhode Island when they continued their batting spree and scored two more runs. Paworski's walk, a double to left field by Fay, Entin's pass, Messina's second double, and an infield blow by Ed Murphy yielded these final tallies.

Although Driscoll allowed the Rams ten hits, he pitched a good game in view of the fact that this was his first appearance on the mound for the Engineers. With Al Bodreau still on the sidelines nursing a dislocated thumb, Ben Lambert the converted pitcher, again took over the catching assignment. Although Lambert is a good receiver, his throwing and hitting can not compare with Bodreau's. It is hoped that Al will return to the lineup soon.

## Phi Gam Beats S.A.E. to Win Third in Row '37 Interfraternity Baseball Promises To Be a Two Team Fight

Phi Sig and Phi Gam continue to keep their baseball slates clear of defeats.

As the half-way mark of the schedule is reached, we find Phi Sigma Kappa and Phi Gamma Delta pacing the league with four wins and three wins respectively. From all appearances, the cup will go this year to the better of these two teams.

The diamond activity program for the week was maintained until the adverse weather conditions, which had been threatening throughout it, climaxed in a deluge which necessitated the postponement of Friday's contest. Monday found L. X. A. behind the superior pitching of Lyman, pinning a 6-2 defeat on T. K. P. The next day, the sluggers of P. G. D. retired S. A. E. in great style to win by a score of 12-2. In the early part of the contest between P. S. K. and A. T. O., Mudgett, of Phi Sig, took it upon himself to win his own game by poling out a homer, good for three runs, which gave him a working margin which was easily protected. The final result of this game was six runs to two in favor of P. S. K. Wednesday, T. U. O. dropped a close struggle to S. O. P. by a 12-5 count. Theta Chi's nine failed to step out of its losing streak, being downed by T. K. P. After fortunately building up a lead of five tallies in the initial frame, A. T. O. threw away all other scoring opportunities and bested T. K. P. by a 5-2 score on Thursday night.

After the week's competition, we find the standing of the teams on Friday, May fourteenth, to be as follows:

Teams	Won	Loss
P. S. K.	4	0
P. G. D.	3	0
S. A. E.	3	2
L. X. A.	2	2
A. T. O.	2	3
S. O. P.	2	2
T. K. P.	1	2
T. U. O.	0	3
T. X.	0	4

## Departmental Notes

### Electrical Department

The next three Sophomore Physics lectures are special lectures as follows: Monday, May 17, "Cathode Rays and X-Rays," S. J. Plimpton; Thursday, May 20, "Measuring the Charge on the Electron," M. Masius; Monday, May 24, "Cosmic Rays," R. T. Young.

### Civil Department

The student branch of the American Society of Civil Engineers will have their annual banquet next Monday evening in Sanford Riley Hall. The price will be seventy-five cents for student members. Interesting speakers will enliven the evening.

Butler, Fabricant, Messina, Entin, Murphy. Two-base hits, E. Fay, Messina 2, Driscoll. Three-base hits, Rushton. Sacrifice, Fitch. Struck out by Fitch 7, Driscoll 4. Base on balls off Fitch 2, Driscoll 5. Wild pitch, Driscoll. Passed balls, Lambert 4. Left on bases, Rhode Island 9, Worcester Tech 6. Time of game 1 hr., 10 min. Umpires, Finnell and Devrone.

## Tech Netmen Lose to Clark and M.I.T.; 5-2, 6-0

### Close Scores in Clark Tilt; M.I.T. Dominates Play; Trinity Cancelled

Last Tuesday the Tech netmen were taken into camp 5-2, by the Clark team on the latter's courts in a match which was originally scheduled for the previous Saturday. The teams were actually more equally matched than the score would indicate. This was the first defeat which Tech has suffered from the hands of the Clark racketeers in three years, and even this match with a few breaks might have resulted in a victory for Tech just as well as not. Practically all of the matches went to three sets, many of which consisted of more than fifteen games each. Captain Michel lost to Stead in two long sets 9-7, 8-6; some of their rallies were exceedingly long, at times taking several minutes before an error was made. Nimmo lost a very close three set match to Smith, but nevertheless, Bob played fine tennis. Bosworth, playing third singles, was the point winner of the day, pulling out a gruelling three set singles match with Bassett after losing the first set. Later he teamed up with Michel to repeat his fine performance in doubles, winning from Stead and Hershman to account for Tech's second and only two points of the match. Goldsmith and Brand both lost long three-set matches in their singles, while Nimmo and Brand lost to Smith and Hershman in second doubles. Indeed, it was a tired team that returned that night, after playing from four o'clock in the afternoon until nearly eight. As it was, they turned in their best performance of the season, lacking just that little push all around necessary to reverse the score.

On Thursday afternoon the netmen again met defeat, 6-0, this time at the hands of a cocky M. I. T. team which had been very successful in the Intercollegiate the day before. Several times during the afternoon it threatened to rain, but the match was completed without interruption. Lythe of M. I. T. defeated Michel, but not without plenty of competition. Nimmo was again bested by Stearns 6-3, 6-4. The diminutive Babcock whisked Bosworth from the court 6-1, 6-0, displaying great confidence in his strokes. Incidentally, he and Stearns are of some Junior tournament fame in New England, having collected several trophies for their efforts. Goldsmith lost to Wholey in two long sets and in doubles Nimmo and Goldsmith went down before the strokes of Lytle and Wholey, 6-4, 6-2. However, in the first doubles Stearns and Babcock had a little trouble in taking over Michel and Bosworth, dropping a set. This was the only three set match of the day.

### Summary of Clark match:

Singles, Stead defeated Michel, 9-7, 8-6; Smith defeated Nimmo, 6-4, 5-7, 6-4; Bosworth defeated Bassett 3-6, 7-5, 8-6; Richardson defeated Goldsmith, 5-7, 6-2, 6-4; Hershman defeated Brand, 9-11, 6-2, 6-2.

Doubles, Michel and Bosworth defeated Stead and Bassett 9-7, 3-6, 6-4; Smith and Hershman defeated Nimmo and Brand 6-4, 6-1.

### Summary of M. I. T. match:

Singles, Lytle defeated Michel 6-4, 6-2; Stearns defeated Nimmo, 6-3, 6-4; Babcock defeated Bosworth, 6-1, 6-0; Wholey defeated Goldsmith, 8-6, 8-6.

Doubles, Stearns and Babcock defeated Michel and Bosworth 6-1, 2-6, 6-3; Lytle and Wholey defeated Nimmo and Goldsmith 6-4, 6-2.

## Boston University Wingmen Hand Out Second Defeat of Season to Worcester Athletes

### Tech Golf Team Ties Up Match With Wesleyan

#### Lundquist and Gaidis Score; Savaria and Gaidis Win Best Ball

The Worcester Tech "digot-diggers" returned to better form last Tuesday, May 11, and after a close match with Wesleyan, succeeded in tying up the score to 3-3. Capt. Herb Lundquist in his match with Pete Harris got off in great form with a series of pars, and closed the match on the fourteenth hole by a score of 6-4. Dave McEwan was defeated by D. Dary of Wesleyan, three up and two to go. In the best ball match Dary and Harris defeated Lundquist and McEwan one-up.

P. Gaidis defeated H. Levine and W. Johnson of Wesleyan defeated Jerry Savaria by a score of one up and two up respectively. In the best ball match Savaria and Gaidis nosed out Levine and Johnson on the eighteenth hole by winning one up.

The game with Trinity scheduled for his last Saturday was called off on account of rain and has been postponed indefinitely.

### Sol Neetem, B. U. Basketball Brilliant, Displays Same Form on Cinders

#### CHANDLER STARS

#### Capt. Webster and Mal Chandler Leading Point Getters For Worcester

Unfortunately Worcester Tech's third track meet of this season met up with defeat at the hands of a superior team from Boston University. The final score was not distasteful, however, being 77½ to 57½. This was the second meet in a row which was hindered by weather not too bad to necessitate calling the contest off, but still enough to hamper any possibilities of spectacular times. Later in the afternoon the skies cleared, and the sun shone on the athletes. A bit of beautiful form was displayed, however, in the half-mile, when the winner set a new school record for B. U. Tech's own La-Liberte, running second, no doubt shattered W. P. I.'s record, for this distance, but unfortunately was not timed, and consequently no official credit can be bestowed upon him. Once again the boys from Boynton Hill were reminded of the athletic prowess of Sol Neetem. All who attended will never forget the brilliant display of basket shooting by this luminary when our school journeyed to Boston to match basketball five, even though we did eke out a close victory. As a track man, Neetem took the high jump, the 220-yard dash, also placing second in the broad jump and the 100-yard dash.

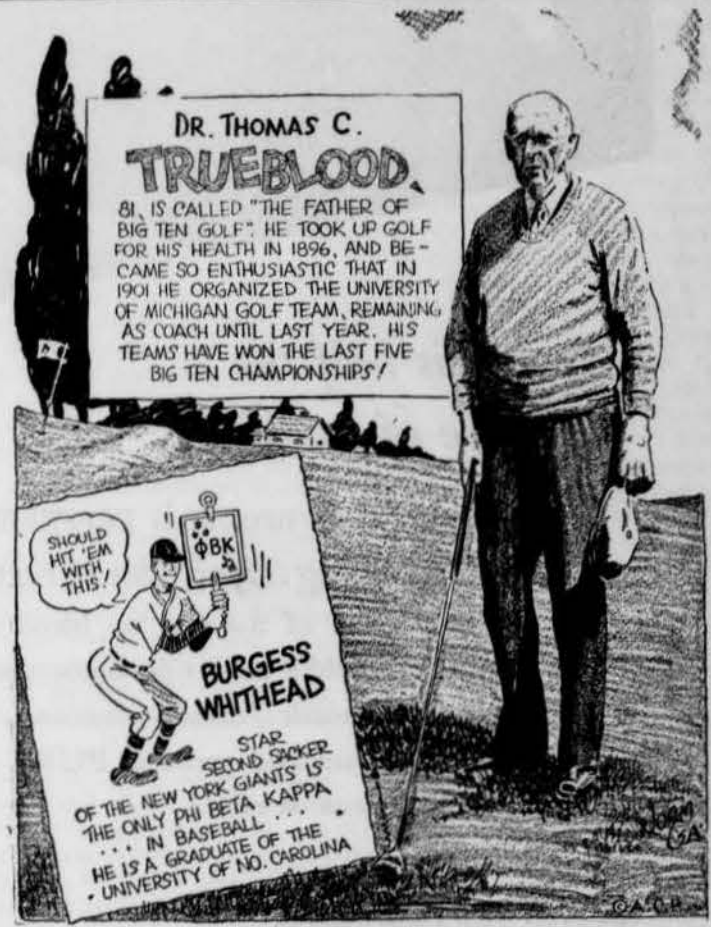

Worcester's individual star, no doubt, was Mal Chandler; and Captain Bob Webster did admirably in taking the next highest number of points. The former took firsts in the discuss and hammer, and a second in the shot put. Webster won the broad and the high hurdles, thereby netting ten more points.

For honorable mention we commend Cameron, Frawley, and Hanson, each of whom cornered five credits toward our total. Boston's sum was advanced (Continued on Page 4, Col. 2)

## A.I.E.E. to Hold Last Meeting

### McEachron of General Electric to Tak

The last meeting for the current season of the Worcester Section of the American Institute of Electrical Engineering will be held on Tuesday evening May 18, 1937 at Sanford Riley Hall. Dinner will be served at 6:45 after which Mr. McEachron, Research Engineer from the General Electric plant at Pittsfield, will speak on the subject of Lightning on which he has made extensive research work.

Mr. McEachron is a native New Englander having been born in Hoosick Falls. He attended Ohio Northern and Purdue University, then taught for four years. Since 1918 has been actively engaged in study of Lightning. He developed the material known as

Thyrite used extensively for lightning arresters on distribution lines. He has presented many papers dealing with lightning and its protection.

Mr. McEachron will show moving pictures, some of them colored, to demonstrate his lecture.

(Continued from Page 3, Col. 5)

by the superior work of McGovern in his tie for first in the high jump, his win in the pole vault, and his second in the high hurdles.

Although this is their second defeat in three starts, Coach Johnstone's charges are not disheartened, and promise lively action in their next contest. Their competitive spirit is by no means dying; in fact, the team is just rounding out into a well-balanced group of athletes.

Summary: High jump: Tie for first Nechtem (B.U.) and McGovern (B.U.) at 5' 9 3/4"; tie for third—Banan (W) and McEwan (W) and Wackerbath (W). Pole Vault: McGovern (B.U.) Blauvelt (W), tie for third—Taylor (W) and Bellotte (B.U.). 10' 9". Shot Put: Benard (B.U.), Chandler (W), Lynch (B.U.). 42' 7 3/4". Discus: Chandler (W), Townsley (W), Lowry (B.U.). 125' 2 3/4". Broad Jump: Webster (W), Nechtem (B.U.), Blovik (B.). 20' 10 5/8". High Hurdles: Webster (W), McGovern (B.U.), Mencow (W). 16:6. 100-yard-dash: Frawley (W), Nechtem (B.U.) Committo (B.U.). 10:4. Mile Run: Cameron (W), Rector (B.U.), Hauser (W). 4:50:5. 440-yard-dash: Raymond (B.U.), LaLiberte (W), Moore (W). 50:4. Hammer Throw: Chandler (W), Crompton (B.), Lowry (B.). 128' 8". 2-mile Run: Bragg (B.U.), Jackson (B.U.), Martin (W). 10:31:5. 220-yard Hurdles: Graham (B.U.), Green (B.U.), Mencow (W). 26:5 sec. Half-Mile: Raymond (B.U.), LaLiberte (W), Rector (B.U.). 1:56:3. 220-yard Dash: Nechtem (B.U.), Committo (B.U.), Moore (W). 22:6. Javelin: Hanson (W), Crompton (B.U.), Lynch (B.U.). 162' 5 1/2".

## Campus Chatter

(Continued from Page 2, Col. 4)

ble over Junior Class jackets. Seems as how the boys want to have jackets the color of the rainbow or at least half of the colors. Will we have the Junior Jackets for the Soph Hop? Will Buck Benny ride again? See next week's issue of the TECH NEWS providing the staff isn't all in jail.

Half-a-Buck Abbe lost his car the other night. Night was dark and stormy but after walking all over Boynton Hill, West St., and looking in the Highland Pharmacy, three blocks, found his car in his own back yard.

Scandal News and stuff. Physics profs. have been holding secret conferences in the Physics lecture hall on most of the afternoons of the week not to talk physics but to drink tea. The profs swizzle tea can you imagine? Well how about it boys? Can we stand for our Prof's drinking tea between classes.

*it must be  
Chesterfield*

*...that delicious aroma  
couldn't be  
anything else*

*Aroma is half the  
pleasure of smoking*

Chesterfield's aroma is DIFFERENT  
...more pleasing...you like it better.

That's because of the way we blend and balance Chesterfield's mild ripe home-grown tobaccos and aromatic Turkish tobaccos...and because the Chesterfield paper is PURE and burns without taste or odor.

Chesterfields will  
give you MORE PLEASURE

*They Satisfy*
