ASOCIAȚIA PARCUL NATURAL
VĂCĂREȘTI

About Us

The Văcărești Natural Park Association (APNV) appeared in 2014 with the aim of establishing and protecting the Văcărești Natural Park. In the association's vision, biodiversity becomes a major component of urban infrastructure, with an essential role in optimizing the quality of life.

As a result of the association's efforts, in 2016, on May 10, the first natural park located in the urban environment in Romania came into existence: Văcărești Natural Park.

The association develops conservation, information and education programs for nature in the urban environment. From the projects developed and implemented so far, we mention: Urban biodiversity path, City birds, Butterfly path, Văcărești - rain garden, Network of urban natural areas, The world through sound and movement, Nature under the magnifying glass - promotion of the Glass Park, Bucharest.
