

PURPLE AND CRIMSON UNITE BAND TALENT

First Joint Concert To Be Given Friday Night; All Invited As Guests

The bands of Worcester Tech and the College of the Holy Cross will unite in Alden Memorial on Friday evening, March 3, to perform a joint band concert. The concert is scheduled to begin at 8:00 o'clock. The Holy Cross Senior Octet will also present a number of selections at this time.

Annual Event

This concert is being given with the idea of establishing inter-collegiate relations on some other basis than the few athletic contests held at the present time. It is hoped that this concert will become an annual affair, and become an important part of the yearly social calendar of both schools.

Following the procedure of most joint band concerts, each band will offer a number of their own selections and then will play a group of selections together.

Outstanding Program

The program will be opened by the Holy Cross band under the direction of Mr. Frederick S. Mirliani. Their first number will be a march called "Holy Cross Crusaders" which was written by Fred Waring in dedication to the College of the Holy Cross. The next selection will be the "Snow White Overture". This contains music from the famous Walt Disney production of the same name. Following the overture will be the well-known "Mexican Hat Dance" by Partichela. The Holy Cross band will conclude their part of the program with Fucik's "Thunder and Blazes" march.

Tech Favors Realism

Mr. William Lynch will then conduct the W.P.I. Band in a carefully selected program which should prove entertaining to the entire audience. The first number to be presented will be the "Pioneer" march composed by Edwin Franko Goldman, the eminent conductor and march composer. A descriptive number entitled "Cavalry Charge" by Luders will then be played by the band. This number is strikingly realistic in its attempt to portray a cavalry charge. The third number in this part of the program will be the "Kilties" march by Morris. Following this number will be a feature part of the program. Dick Jones and Dick Bartlett, whose xylophone solos have met with tremendous success at previous concerts, have prepared a new program to present at this time.

The final part of the program will consist of selections performed by the combined Holy Cross and Worcester Tech bands. The first

Combined Glee Clubs in Excellent Voice For Well Received Concert in Alden

Tech's Octet Makes Hit in Presentation Of Lighter Ballads

Last Saturday night saw one of the most successful concerts to date as the combined voices of the University of Connecticut, Tech and Becker Glee Clubs shook the rafters of Alden Hall and rebounded from the teak-wood floor.

The program began with the combined clubs singing three religious numbers, Handel's "Let Their Celestial Concerts All Unite," Palestrina's "Adoremus Te" and "Lo, A Voice To Heaven Sounding," by Bortniansky.

In the second portion of the concert, our own Club sounded forth with "Onward Christian Soldiers," the "Autumn Sea" and "The Sleigh." In reply to the hearty applause, Director Clifford F. Green introduced one of his new Tech songs "O Never O Never," was also well received.

Tech then changed places with the University of Connecticut Glee Club. Beginning with "Hail, Smiling Morn," they rose with "Go, Lovely Rose" and "Madame Jeannette" to their rousing ending with Bennett's "Crazy Cantata." Not to be deprived of such entertainment the rows applauded loudly, and were rewarded with the "U. Conn. Husky" song.

Our own Club returned next to the stage, and in magnificent fashion delivered "Climbin' Up The Mountain," Romberg's "Drinking Song" and "Sourwood Mountain." Again the audience demanded, and Mr. Green's second song, the "Tech Hymn" filled the hall.

They were followed by the University of Connecticut Carollers, a truly gifted dozen, who delivered selections from Brahms's "Liebeslieder Waltzes."

Tech's Octet, a sensation wherever they sing, then took the stage. Their first selection was "Glorious Apollo", then followed "Two Little Girls In Blue," from which an unprepared audience heard them swing into "She Promised She'd Meet Me." Before the laughter could subside, they were listening to "Margie," then again laughing at "Come After Breakfast." The audience wouldn't let the Octet go; paced by seat-rattling applause, Tech's eight returned to the stage to harmonize on "Eveline".

The combined Clubs finished the Concert with Shaw's "Set Down Servant" and the "Russian Picnic" by Enders.

No statement was necessary from Tech's director, Clifford Green. His evening-long smile spoke more than volumes.

Masque Completes Casting For Prom Play "See How They Run"

Casting for the male parts in the annual major production of the Masque was completed on Monday evening, February 20. The play, which will be produced during Junior Prom week-end, is *See How They Run* by Philip King, a fast-moving, hilarious farce, well in keeping with the festive spirit of the formal week-end.

The Masque was fortunate this year in being able to cast experienced thespians in all the roles. Four seniors are included in the cast: Robert Smith, Richard Connell, Roland Bedard and Donald Thompson. Smith will be remembered for his fine work in *Ten Little Indians* and *Command Decision*. Connell has appeared in *Command Decision* and

played the lead in this year's one-act extravaganza *The Villainous Shah of Shush*. Techites saw Bedard as the wisecracking sergeant in *Command Decision*. Thompson previously appeared in *Ten Little Indians*. The junior in the cast, Owen Ott, has had roles in *Ten Little Indians* and *Command Decision*. The sixth member of the cast is James Field, a freshman, who appeared in the one-act production last term in the role of the young hero.

There are three female parts in the play, but at this writing only one has been chosen. The female lead will be played by Mrs. Ruthe Olson, who has previously appeared in *Ceiling Zero*, *Male Animal*, and *Ten Little Indians*.

number in this group will be Fillmore's "His Honor March". Following this march will be a group of selections from "South Pacific", the recent Broadway musical show by Richard Rodgers which has met with unprecedented success during this last year. As a concluding number the bands will play the ever popular "Knightsbridge" march by Eric Coates.

Invitations have been sent to all fraternities and to Sanford-Riley Hall. They also may be obtained at no cost from members of the band.

ATTENTION

On Tuesday, March 7, at 7:30 P.M., the student chapter of the AIEE will sponsor its annual student Forum for the EE's.

Mr. Ernest W. Davis, Chief Engineer for the Simplex Wire and Cable Co. will act as moderator.

Consult your class representative on your likes and dislikes in the EE department so that they may be brought up at the Forum.

Consult the bulletin board for the place, and—remember—this Forum is open to all.

Billy Ram To Ham In Film Saga Of Tech

Shades of the "Old Vic." The Tech Campus has been veritably transformed into a page from *Esquire* due to the well founded rumor that the Alumni Association is planning to produce a motion picture depicting the life and loves of Mr. Billy Ram. "Billy," whom we understand stands at the head of his class, will be the man whom prospective Tech students will see in the motion picture as the culmination of all the fine traits evident in the true student of the Institute. So away with the beards and old clothes, be careful of your choice for a date to take to athletic events, and ... Lights! Camera! Action!; the great saga of the half-century is underway.

In a more serious vein, however, this film is the result of a careful study by a committee representing various phases of the Institute's program headed by Mr. Donald Smith of the Alumni Association. The group consists of: Admiral Cluverius, Professor Downing, Dean Swan, Professor Wellman, Professor Locke, Mr. Robert Pritchard, Professor Higginbottom, Dean Howe, and Mr. Allan Hardy, '37. This group came to the conclusion that a film was needed to present to secondary and preparatory school students a pictorial view of the activities and facilities offered to the Tech students. All phases of the problem have been considered by this staff and the Board of Trustees. It is their well considered opinion that this film will give Alumni groups and the public relations department a ready means of publicizing the school.

The organization that will film the actual production is an excellent company, well-grounded in this type of endeavor. It is the Bay State Film Productions Incorporated of Springfield, Massachusetts. This studio has produced promotional films for Springfield College, Vermont Chamber of Commerce, and the Westinghouse Company.

Their method consists of sending

a script-writer to the school who inspects the material to be treated and from this he works out the special slant that will be given to the subject. This representative was here on December 1, 1949, and since that time the final script has been proposed in conjunction with the Tech Committee.

The general plan is to select a Tech student to represent his prototype in the film. A narrator from the Company will describe his itinerary as he progresses from class to class absorbing knowledge by the well-known process of osmosis. Around this will be built the background material which will show such activities as assemblies, basketball games, and other school functions. To squelch an ugly rumor, the Boynton Cafe on Friday night is not to be included.

The majority of the film will be finished by commencement excluding the necessary shots of the cheering thousands at football games, and scenes of the campus in its autumnal glory.

Here is your chance to be remembered by posterity. Attend all the functions, bring your best looking girl, but please—no hamming. With the students cooperation the Alumni Association will produce a film we will all be proud to view.

BLOOD BANK RETURNS TO TECH CAMPUS

Red Cross Officials Hope to Obtain Minimum Quota of One Hundred Pints

On Wednesday March 3, 1950 the Red Cross Mobile Blood Bank will set up shop once again in the Alumni gymnasium. Under the direction of "Doc" Carpenter and local Red Cross officials it is hoped and expected that the quota of 100 pints will be met as it was last year by the donations of Tech students. In order to volunteer blood, it is necessary for any donor under 21 years of age to obtain their parents consent through the signing of a release form, which in body, releases all members of the

staff from any claims by relatives, heirs etc. of the donor. Upon receipt of this release, the donor is scheduled somewhere between 10:00 A.M. and 3:45 P.M. such that the schedule of six men every 15 minutes may be adhered to. It is suggested to the donors that a substantial meal should be eaten at least four hours before donating. Shortly before visiting the gym no fatty foods such as butter, cheese, ice cream or eggs should be eaten.

After arrival at the gym the donors will be registered and have their blood typed. (In the typing process it is sometimes found that the blood of a certain volunteer is not acceptable for use as whole blood or processed blood. Donations are not accepted from persons having had jaundice but will be taken from any

— THE STUDENT SPEAKS

In the near future, the popular EE Forum will be held under the sponsorship of the American Institute of Electrical Engineers and the Institute of Radio Engineers.

The Forum is an annual affair at which elected representatives of each class meet in a discussion group with members of the faculty of the EE Department, under the guidance of an impartial moderator. The Forum serves the purpose of allowing the student body—once a year—and through proper channels—to address their criticisms and suggestions directly to their faculty. In addition to the elected class representatives, any student may attend and direct questions to the panel.

This marks the third year of the Forum, and its past success has been undisputed. The faculty regards it as a valuable register of student opinion; the students are naturally enthusiastic.

The question immediately arises as to why the other departments here at Tech do not follow the lead of the EE Department and provide a similar outlet for student opinion. The comparison becomes especially pointed when one realizes that student organizations similar to the AIEE and IRE exist in each of the departments.

It does not seem consistent that the same student who is marked down and criticized for failing to use the intellect and common sense that he is assumed to possess is denied the right to criticize and advise on the grounds that his capacity for judgment is considered insignificant.

Look to the field of industry. There Management holds frequent conferences with Labor with the intent of benefit to both. The result has been more cordial relations, improved working conditions—and an increase in the quality and quantity of production.

The Tech student, after all, has devoted four years of his life—at \$600 per annum—to acquiring an education. Constant demands are made on his time and energies, and he is forced to toe the mark and meet the standard. Are we to assume that he is to meet all this passively; that he has no opinion of merit, no constructive suggestions; that he is refused the opportunity to discuss with his faculty questions common to them both?

The answer is apparent; it remains for the students and faculty—working together—to find the means. G.F.A.

Tech Grad Wins National Award

During the week of final examinations of last term, a Worcester Tech graduate student in the Electrical Engineering department, Robert M. Lerner of Shrewsbury, was awarded a prize by the American Institute of Electrical Engineers. It has been the policy of the A.I.E.E. to sponsor competition among the members every year.

This competition is divided into two parts. One part is made up of District competition throughout the

country. This consists of an oral presentation of some theory that each of the competitors has worked out. The other part of the program is made up of a national contest for written theses on a practical theory developed by the contestant.

This year the awards were made on February first at the Hotel Sheraton in New York City. A general session of the A.I.E.E. was held at this time, and the awards were made during the convocation. Robert Lerner was awarded the Second National Prize for his thesis on "Phase Measurement by Pulse Technique". Previous to this he had won a District

AROUND THE GREEK CIRCUIT

By STAN BERMAN

Here goes your fraternity reporter again—in goes the plug, down goes the switch, and the "juice" begins to flow. The Greek Circuit is now complete.

L.C.A.

The weekend of February 10 found one-half of L.C.A. at Norwich University to install a new chapter of Lambda Chi Alpha at that institution. For two years the Worcester chapter has been a big brother to the Norwich group as they were forming the new chapter. Little time was found for sleeping with a Smoker held on Friday night, initiation and installation Saturday, and a banquet at the Pavilion Hotel in Montpelier Saturday night. This event was probably one of the largest in the recent history of the Worcester chapter.

The valentine spirit really took effect at Lambda Chi. Three of the casanovas returned to the Trowbridge Rd. domain without their jewelry. "Ziggy" Sohigian's pin went to Tillie Germagian of Watertown, but everyone is wondering whether it

was Tillie or her Dynaflo Buick that "Ziggy" was really after. Art Nied lost his to Barbara Wood of Worcester, and Jean Kinsley, a third grade school teacher, succeeded in winning Ed Saling's heart.

Congratulations to Ken Miller, Larry Scinto, Ed Kulmacz, Donald Kranz, and Dick Englund who became full members at the initiation last week.

S.P.E.

Last week found Sig Ep at M.I.T. playing basketball with the Pegis Club. Sig Ep emerged the victor, 30-26, with Dave Holmes leading the Worcester array. He was high scorer with 10 points. The Pegis Club will eventually become a chapter of Sigma Phi Epsilon. After the game, a party was held at the Club, and a fine time was had by all who attended.

A.E.P.

Things at A.E.Pi. have been quite quiet the last few weekends; the boys are looking for something new in the line of the opposite sex. Last Saturday Al Willis and "Diz" Nisenoff journeyed to Smith College "to look the place over". When questioned

about their conquests, they replied in unison, "We'll never tell." Hmmm? This weekend finds Sumner "so what if I can't bowl" Herman at the Skidmore Winter Carnival. When asked why he wasn't taking any outdoor sport accessories, he very curtly replied, "Who's got time for outdoor sports?"

Sid Kessler is still trying to pass a new fraternity law that would allow his newly-born son to play basketball for the house. If he plays like his "ole" man, maybe they can use him on the marble team.

T.K.P.

This term Theta Kap is under the capable direction of a new slate of officers. They are Dud DeCarli, president; Leo Lemere, vice-president; Gus Gosselein, secretary; and Dick Coffey, treasurer.

Last weekend found T.K.P. enjoying a valentine dance. Many alumni were welcomed back at the dance; among these were Tom Coonan and Jim O'Regan. Speaking of valentines, who is that shapely miss who shouts with glee every time her "Billy Boy" get a basket.

Eleven Tech Seniors Chosen for Who's Who in American Colleges

The selections of Seniors, for the publication of "Who's Who in American Colleges and Universities", have been announced by the notification of those selected by "Who's Who". Eleven members of the Class of '50 were selected. Those chosen were George Barna, John Brierly, Paul Brown, Tejinder Chaddha, John Cocker, Neil Crowley, David Danielson, Stanley Friedman, Malcolm Horton, Richard McMahan, and Kenneth Muccino.

Barna has starred in track and basketball, has been Editor-in-Chief of the TECH NEWS, and is President of the Athletic Council. He is also a Senior Editor of the *Peddler*, and a member of Theta Kappa Phi Fraternity. His honor societies are Tau Beta Pi, Pi Delta Epsilon, Eta Kappa Nu, and Skull.

John Brierly has been President of his class for four years, President of Phi Sigma Kappa Fraternity for two years, played basketball, contributed to the TECH NEWS three years, and was the recipient of the Skull Trophy as the outstanding member of his freshman class. He is also a member of Skull.

Paul Brown is Editor-in-Chief of the *Peddler* and manager of the band, has been Vice-President of his class for the past three years, and Vice-President of his fraternity, Theta Kappa Phi. In addition, he is a member of Skull and Pi Delta Epsilon.

Tejinder Chaddha is Managing Editor of the *Peddler*; President of the Debating Club, Cosmopolitan Club, and A.I.Ch.E.; and Vice-President of Pi Delta Epsilon.

prize for his oral presentation of the possibilities of phase measurement by this method.

John Cocker is President of Tau Beta Pi, is a member of Skull, Sigma Xi, and Eta Kappa Nu, and has been active in the Masque.

Neil Crowley is President of Skull, Treasurer of Pi Delta Epsilon, a past President of Theta Kappa Phi, a Senior Editor of the *Peddler*, and has been active in the Masque, TECH NEWS, and A.S.C.E., of which he is Vice-President. He has also chairmanned two prom Committees.

David Danielson is President of the S.C.A. Cabinet and Manager of the Student Center, Secretary of Tau Beta Pi, and a past Vice-President of Alpha Tau Omega Fraternity. He is a member of Sigma Xi and Eta Kappa Nu.

Stanley Friedman is Manager of the baseball team, Business Manager of the *Peddler*, a member of Alpha Epsilon Pi Fraternity, Tau Beta Pi, Sigma Xi, Pi Delta Epsilon, Skull, and Eta Kappa Nu, and has been President of AEPi for two years, as well as a contributor to the TECH NEWS.

Malcolm Horton is manager of the basketball team, has played tennis, soccer and lacrosse, contributed to the TECH NEWS and is presently the President of the A.S.C.E. He is a member of Sigma Phi Epsilon, Tau Beta Pi and Skull.

Richard McMahan is President of his fraternity, Phi Sigma Kappa, class historian, a member of Skull, Tau Beta Pi, Pi Delta Epsilon and Eta Kappa Nu, and has been active in the Glee Club and TECH NEWS.

Kenneth Muccino has received a letter in football, been Secretary of the Athletic Council, Vice-President of his fraternity, Theta Chi, and is now president of the Tech Council.

STATE TEACHERS TO DEBATE TECH

Tech's Debating Club plays host to the Worcester State Teachers' College team at the Riley House, Tuesday, at 7:30 P.M. in an intracity league disputation.

The Hilltop team, currently holding down second place in the league consisting of Clark, Holy Cross, State Teachers', and Tech, and will take the affirmative in discussing the current national collegiate debating topic. This subject, which is now being discussed by college debaters throughout the country, is: "Resolved, that the United States should nationalize all non-basic, non-agricultural industries."

William C. Bicknell '53, and James C. Dean '50, will try for Tech's third victory in four starts this season. Only unbeaten Holy Cross has outtalked the Hilltoppers this season, while Clark has twice bowed to Tech.

The first-string debating team contains four berths, three of which are held down by Bicknell, Dean, and Tej Chaddha '50 at the present time, while the fourth spot is pending. Plans for a tour of debates on Patriots' Day, April 19, are being made by the team to include Trinity, Mt. Holyoke, and Smith.

Meetings of the Club are held at 7:00 P.M. on Mondays at the Riley Center. The group, advised by Mr. Donald E. Johnson of the History Department, has a twofold program in operation: to hold inter-school debates, and to train beginners in debating. Four first team spots are open to club members, as well as berths on two four-place second teams. Prospective members and interested visitors are always welcome. Prexy Chaddha points out.

TECH NEWS SPORTS

Camera-Shy Techmen Lose To Huskies

Bombers Lose at Foul Line

By MIKE ESSEX

Perhaps it was stage fright, owing to the fact that the Alumni Gymnasium had suddenly been turned into a movie set, but in any event our Engineers suffered their second straight defeat last Saturday, loosing to the Huskies of Northeastern by a score of 47 to 37. The visitors were by no means a power-laden quintet, but they happened to meet Tech on the latter's poorest night of the season. The home club showed little of the fire and scoring power that has characterized its previous contests. From the very outset, their play was ragged, their shooting woefully off, and their rebounding far from its usual standards. The other deciding factor in this sixth setback was the tight zone defense employed by the Huskies.

The visitors completely jammed the inside, and gave Harry Brown no opportunity to work in the bucket. Had the Bombers outside aeriels been working within a fraction of last week's consistency, things might have been different. Despite this fact however, the home club could have won if their foul shooting had been reasonably accurate. The visitors also had trouble in finding the hoop. They tallied 15 floor goals to Tech's 13, but it was their foul shooting that brought them the victory.

The Engineers remained in the ball game for exactly 10 minutes. Keyes of Northeastern started it off with a right hand push, and Richie Howard retaliated with a one hand set. It was evident that both squads were finding it difficult to get their attacks underway and at the end of 5 minutes the score stood 4 to 4. Then Jackson of the Huskies sandwiched three hoops between a foul shot by Brown, a long set by Mehalick, and a hook by Brown. This put Northeastern out in front 11 to 10 midway through the first half. At this juncture, this same Mr. Jackson broke the hearts of all those assembled by quickly adding two layups and a jump shot. Tech never recovered from this one man onslaught. The Huskies left the floor at half-time leading by a 24-17 count.

As far as the Tech rooters were concerned, the final few minutes gave

them more to cheer about than any action that had previously taken place. During the first 17 minutes of the second half all the scoring that the Engineers could muster were two floor goals and five conversions from the charity stripe. Meanwhile the Beantowners, methodically built up a substantial margin, leading 44 to 26 with 3 minutes left to play.

For the next 120 seconds the home team were the Boynton Bombers of old. With George Barna providing the spark, the team suddenly caught fire. Harry dunked his second and third baskets of the night, Barna added a layup and a pair of free tries, Richie a foul toss, and Dan Hoch another layup. The Huskies meanwhile tallied only a single point and Tech had narrowed their lead to 8 points. However Richie fouled out, the visitors added a pair of free tries and retained possession of the ball during a hectic final minute.

Jackson had 14 points for the Huskies, while Harry Brown and Richie Howard had 10 and 8 points respectively for Tech.

The Tech J. V.'s, with their usual poise and composure, seemed unaffected by the Kleig lights and romped to a 65 to 49 victory over the Husky Cubs. Dick Hall paced all scorers with a brilliant 27 point contribution.

Tech Tumbled by Trinity Quintet, 63-52, In Bishop's New Memorial Field House

Amazing Set Shooting Paces Winners As Tech Team Fails to Hoop

Worcester Tech dropped its fifth game in eleven outings last Tuesday to a good Trinity ball club at the Memorial Field House in Hartford, 63-52. Tech, showing its usual hustle, kept pace with the Hilltoppers in the early moments of the game. But then the Trinity team led by Bob Jachens really got hot, forged ahead, and enjoyed a comfortable margin thereafter.

With Harry Brown, Richie Howard, and all the boys doing yeoman work, Tech kept within range of the fast-breaking Trinity club only to trail by one point, 15-14, at the ten minute mark. But here Trinity's Bob Jachens, an outstanding set shot artist, started hitting on his shots, making four for four. In fact, Jachens made good on six out of seven for his first half contribution. As a result of Jachens' sparkling play the Tech team fell behind, and trailed at halftime 38-25.

Trinity retained a comfortable lead throughout the second half, leading the Tech men 51-31 going into the last quarter. With Trinity reserves in the game, Tech cut into this spread, reducing it from twenty

at the beginning of the last stanza to eleven at the final buzzer.

For Trinity, Jachens led the scoring with 18 points followed by Smith with 13. Harry Brown caged 18 points to tie Jachens for the scoring honors, while Andy Freeland was runner-up with 13 for the Worcester team.

In the preliminary, the Tech Jayvees went down to defeat at the hands of the Trinity Frosh by a score of 56-48. The Tech Junior Varsity trailed at halftime, 28-23, but as a result of great second half pitching by George Joest, the home team came near to upsetting the favored Trinity quintet. Whitbred had 19 for the winners, while Joest with 11, and Shebeck with 8 led the home team.

Engineer Swimmers Swamped by Tufts In Local Tank

Rowe Wins Freestyle For Sole Tech First, But All Events Close

The Tech swimmers took one on the chin as the visiting Tufts mermen captured all but one first place to win 50 to 25. The Jumbos' fine afternoon was heightened by the sterling performance of Haley, who set a new pool and New England Intercollegiate record for the 220 yard freestyle with his time of 2:15.4. Though the score was one sided, most of the races themselves were very close; more notably the 400 yard relay and 300 yard medley, which were near photo finishes. Rowe took the only first place for Tech in the freestyle.

Tufts 50—WPI 25

- 300 yard Medley Relay—won by Tufts. Time 3.28.2
- 200 yard Freestyle—Won by Haley (T). Time 2.15.4
- 60 yard Freestyle—Won by Rowe (W). Time 0.32.0
- Diving—Won by Tufts
- 100 yard Freestyle—Won by Tyler (T). Time 0.57.6

- 200 yard Breast—Won by Dube (T). Time 3.02.0
- 440 Freestyle—Won by Haartz (T). Time 5.44.8
- 400 yard Relay—Won by Tufts. Time 3.59.9.

Tech Trackmen Tied By Mass. Univ. 43-43 In First Indoor Meet

Relay Team Comes Close To Breaking Old Record For Cage Miss by .2 Secs.

The Tech trackmen visited the Mass. U. cage to run in its first meet of the indoor season and returned with a very credible 43-43 tie. This score seems most amazing when it is noted that the members of team have had very little and, in some case, no practice at all.

Harvey Howell, taking a rest from his diving for the swimming team, was the top point maker with a first in the 220 low hurdles, second in the 35 yard dash, and a third in the 120 high hurdles. Zeleney came through with a first in the 880 yard dash and a second in the 440 yard dash. In the high jumps, Lovell cleared the bar at a winning 5 feet 6 inches.

The performance of the evening, however, came in the 680 yard relay. The Tech foursome, made up of the Howells, Roberts, and Dillon burned up the track with a 1:18.6 timing which was only .2 seconds off the cage record.

There are still meets with Bates and Trinity scheduled for March 11 and 18. Coach Sannella would like to see more men out. Runners will train daily. Weight men, hurdlers, and jumpers will have the gym on March 1 and every Saturday morning at 11:00.

JV's Rally To Win Close One

Worcester Academy failed to suppress a fourth period rally Wednesday afternoon and the W.P.I. Junior Varsity went on to ease out a 38-36 victory in a fast moving tilt at the Academy gym.

The little Engineers had to go all out in winning their ninth game in eleven starts. Tech trailed the Preppers most of the game, but the Pritchard Men finished strong.

The Academy five led 34-29 with six minutes left, but Techmen Joest and Shebeck then took matters into their own hands and tied it up at the auto. Willard and Shebeck iced the game with a brace of freethrows and it was all over.

PHI GAM STILL LEADS PACK IN I.F. BOWLING

Sig Ep Threatening With Deciding Tilts Scheduled For Final Week

SPE's one sided victory over PSK on February 21 made them a serious threat to PGD's intramural bowling lead. Sig Ep's only remaining contest is with LCA on the last day of the tourney, while Phi Gam has yet to meet ATO, PSK, and AEP. Top notch rolling will be required of the Fijis if they wish to remain on top. ATO, idle this week, is still in the running but has PGD and LCA on the schedule. Theta Chi may have dealt the death blow to TKP with their 3-1 victory last week.

Hugh Lovell of PGD still sets the pace for the keglers with a nifty 95.9 average. Following him in the 93 to 94 average bracket are Murdock, Johnson, Harding, Sanford, Richards, and Shattuck.

The standings as of February 25:

PGD	14	6
SPE	19	9
ATO	15	9
TKP	15	13
LCA	10	10
SAE	11	13
PSK	7	13
TC	9	15
AEP	4	16

Lensmen Plan Model Night

Tech's shutter snappers have reached a photographers' heaven, comments Frank Ataman, president, in announcing that this year's supreme goal to complete the dark room, has come to a realization. An Omega D-2 enlarger, claimed to compete with the best, has been purchased along with other equipment. So that the new implements will not collect dust, Ziggy Sohigian, secretary, is preparing a new schedule for the members. For the bi-monthly meetings, a series of print competitions with prizes is being arranged. This coming March 7 will find the "bugs" attending a portraiture discussion in preparation for the season's gala event—Model Night. With an expert advisor to help on the finer points, the boys are to be turned loose on some very fine species of the weaker sex. The tournament awards are open to all brave knights of W.P.I.

BLOOD BANK—From Page 1 person having had malaria.) The actual donation follows the typing process. This will be done in the "strength test" room especially set up with proper lighting and other facilities necessary for the comfort, assurance and speedy handling of all donors. Coffee, orange juice, crackers and the like, are served by the staff immediately following. The actual donation takes about 15 minutes after which the donor experiences no marked ill effects. The blood is then sent to the main blood bank in Boston where some of it is kept for whole blood and the rest processed for valuable blood derivatives. These blood derivatives are used in the treatments of a varied number of diseases. For example, measles serum is made from derivatives of the blood of a person who has had malaria. Through the use of this process, one pint of blood may serve to cure any number of disease victims rather than just one, as is the common belief. These donations are confined for use in Massachusetts alone, and although doctors and hospitals may charge for their services in administering blood transfusions, no charge may be made for the blood used from this source.

Learn how YOU can become an Officer in the U. S. Air Force

AN AIR FORCE INTERVIEWING TEAM WILL BE HERE TO GIVE YOU FULL DETAILS

(Date) Feb. 7 - Mar. 3
(Time) 9 A.M.-5 P.M.
(Place) Reception Room Sanford-Riley Hall

Here's your opportunity to qualify for Aviation Cadet training. To be eligible, you must be single, between the ages of 20 and 26½, with at least two years of college and with high physical and moral qualifications.

Find out about the academic, military and flying training you'll get as an Aviation Cadet—either for pilot or navigator. If qualified, your papers will be processed so you can begin training after you finish college.

Learn about the important career opportunities open to you as an officer . . . after you have won your wings as pilot or navigator . . . and received a commission as second lieutenant in the Air Force!

...NON-FLYING CAREERS, TOO!

Never before in peacetime has there been such an opportunity for college-trained men and women to obtain commissions in the U. S. Air Force. If you are interested in a non-flying career in aviation, ask for information about Officer Candidate School.
