

# Hooping

---

*A 3D space racing game*

## Ship Selection

Attributes:

- Speed Indicates the maximum top speed of the ship
- Acceleration How long the ship takes to reach the next throttle speed
- Handling How fast the ship rotates
- Durability How much damage the ship will take when hit

Skills:

- Boost Ship travels at 150% top speed for a short time (**must be used at 100% throttle**)
- Repair Returns the ship's durability to 100%

## Controls

- W key Increase throttle by 20%
- S key Decrease throttle by 20%
- Space bar Activate skill (if equipped)
- Mouse Rotate ship
  - Push the mouse left or right to turn horizontally
  - Push the mouse up or down to turn vertically
  - How far you push the mouse determines how fast the ship turns
  - Center the mouse to stop turning

## Game Modes

- Practice fly around the race course at your leisure
- Time Trial you have a certain amount of time to reach the next hoop
- Lap Count See how long it takes to complete a certain number of laps

## Options

For different screen resolutions, change the values in the file Data/Engine/variables.cfg:

```
$displayWidth  screen width
$displayHeight screen height
$displayFull   display full screen (0 = windowed screen, 1 = full screen)
```
