Fish Stock Depletion: Mainland Tanzania

Ally Stoyle, Remy Michaud, Melissa Kuhn

PROBLEM

The current rate of fish depletion in Tanzania, Africa will lead to malnutrition and failure of the fishing industry.

Current Status

- · Over Fishing
- Poor Environment

Species Die Off

- Economy Suffers
- Reduced Catch

Increase In Hunger

- Reduced Development
- •Increased Dependence

SOLUTION

- Aquaculture
- Planting crops
- Policy
- Monitor water flow

SUSTAINABILITY

Economic Growth

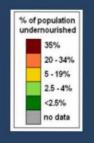

Food Security

Maintain Improved
Culture Nutrition

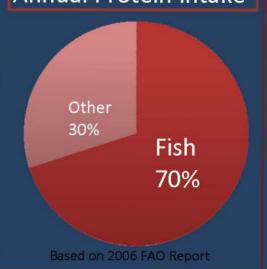

MECHANISMS

- Restocking of fish supplies
- Environmental protection
- Policy reinforcement

Annual Protein Intake

ASSESMENTS

Nets/Fishing Techniques:
