Denver, Colorado 80223

Dear Duane:

Attached is your letter of November 21, 1966 which I have signed as you requested.

Please forgive the delay in responding but we wanted to be sure that the question was carefully checked out.

I hope that all is progressing well on your design so that our schedules for production and selling in 1967 can be met.

Best regards,

S. J. Nelson

November 21, 1966

Mr. S. J. Nelson, Vice President  
Commercial Division  
Honeywell, Inc.  
2747 Fourth Avenue South  
Minneapolis, Minnesota 55408

Dear Mr. Nelson:

Enclosed is a signed copy of your letter of November 9 relative to cancellation of our confidential disclosure agreement of July 28, 1964.

I appreciate your attention to this matter in keeping all of our formal relationship in good order.

To bring our current "state of the art" in the fire detector up to date, and to clearly identify development responsibility to this date, I have enclosed our Drawing No. A-50002B dated November 17, 1966. This drawing represents the complete circuit of the fire detector to date and a copy of this drawing has been left with your Engineering Group in Chicago. It is important that this drawing be acknowledged since there appears to be certain patentable features of the circuit developed since our original patent application and this matter is currently under review by our patent counsel.

We would appreciate your acknowledgement that the attached referred drawing and any patents or proprietary interest in the fire detector as represented by this drawing is the property of Statitrol Corporation. In addition, at this time we have submitted a prototype model to demonstrate the

Mr. S. J. NELSON

possibility of incorporating the circuit as shown in the attached drawing into a self-contained residential type fire detector.

Very truly yours,

STATITROL CORPORATION
